

# Thin Client Applications

## Assignment 2

**Due Date : Aptil 30<sup>th</sup> 2015 (1:30)**

Generate the web page(s) for a national GAA Division 1 league site that includes the following :  
Using the DOM create the HTML page that allows users to enter teams dynamically. Give the user the ability to enter between 4 – 8 teams.

Automatically generate the matches for all the teams entered.

Allow the users to enter results manually or to automatic generation results.  
The web page displaying the teams' table should incorporate previous results.  
Previously generated results can be viewed from an archive page.  
Provide a sponsor page section that displays images from sponsors in a slide show.  
The website also includes details for upcoming events, news and weather .  
Use CSS/XSL for page presentation and navigation of your website.
